

METATRON AUTO HARMONIZER™

With the METATRON AUTO HARMONIZER™

- One remains calmer and more harmonious when driving in heavy traffic.
- Long trips are more comfortable with considerably less stress and fatigue.
- Children are better behaved during both short and long trips.
- Many users report improvement in fuel usage.
- Coherence is expected to assist in reducing wear and tear on vehicle parts.

How the METATRON AUTO HARMONIZER™ works and why

Motor vehicles are a maze of chaotic electromagnetic fields (EMFs) because:

- The vehicle's electrical system creates chaotic electromagnetic fields.
- The many computer chips in modern vehicles create chaotic electromagnetic fields.
- The metal in the vehicle is a resonator, which attracts chaotic electromagnetic fields from any source (other vehicles, buildings, power lines and etc).

These factors create an environment in the vehicle that imposes a constant load on the physiology of anyone in the vehicle. Each person is required to use a great deal of energy to maintain their balance, thus creating stress, fatigue, dullness and irritability, which can escalate into road rage.

The Metatron Auto Harmonizer™, which plugs into the cigarette lighter or power outlet, transforms the chaotic electromagnetic fields into life-supporting fields that are in harmony with the natural fields created by the human physiology. It does this through a proprietary technology that re-references the man-made chaotic electrical current to the Unified Field.

In the Metatron Auto Harmonizer™ we have a simple, natural, life-supporting solution to this serious and very pervasive problem of EMFs. The Metatron Auto Harmonizer™ transforms the environment in and around your vehicle from a bubble of chaos into a bubble of coherence.

The Metatron Auto Harmonizer™ is **\$89.00** and carries a

Customer Feedback:

“Although I have always enjoyed driving, sometimes the traffic in LA can get really intense and I can feel extremely stressed and impatient. Since I have the Auto Harmonizer, I am totally relaxed in ALL situations and I actually feel safer. And since I’ve added the Metatron Personal Harmonizer to the equation, driving has become blissful. Also, my car seems to be driving more smoothly (maybe it’s in bliss too) and my gas mileage has improved perhaps as much as 20%. I am truly grateful for this amazing technology.”

Zahn, Pacific Palisades, CA

“Both Lee and I have felt a significant improvement in the car's energy. We have a Prius and I guess because of the new technology, it has been stressful energetically. So we are very pleased with our auto harmonizer. I would guess there is maybe two miles per gallon increase in mileage. Also the personal harmonizer is a welcome support for being 'out there.' We are very grateful for all your efforts. All the best,”
